

## Educate your patients with high quality 3D animations and presentations

## 3D Animations

A full library of high-definition patient education animations covering a broad range of dental treatments and specialties is available to you as an ICE Patient Education user. Using ICE Patient Education, you choose, edit, and assign animations to your patients to educate and improve treatment plan buy-in. ICE's animations are short, vibrant, and informative, ensuring that your patients will want to view them and learn at the same time.

### Flexible

Cloud-based technology allows you to assign animations to your patients chair side, or elsewhere. Your patients benefit, too, with the freedom to view their assigned animations from any online computer.

### Customizable

Designed by dentists, ICE's Animations tool is easy to use for the Provider, and easy to access for the patient.

### Easy to Use

With ICE's animations, you can edit animations to tailor them to your patients' needs. You can also save yourself time with global templates, giving you the ability to customize sets of animations for treatments that you use frequently in your practice.

- ✔ Mac and PC friendly
- ✔ Your patients can view animations chair-side or from the comfort of their home
- ✔ Patients can access animations from your practice's website
- ✔ Enhances and encourages communication with patients
- ✔ Helps get your patients on board with their planned treatment
- ✔ Allows you to offer truly informed consent
